Managing Director’s Message

Goa Forest Development Corporation is formed in the year 1997 with the objective of increasing the commercial production of cashew and rubber plantations. The staff of GFDC are working hard to increase the productivity of these plantations. GFDC is doing cashew gap plantations in old senile cashew estates under cashew Rejuvenation scheme of state government and also under centrally funded scheme of Directorate of cashew and Cocoa development Board. There is lot of scope for growth and development of GFDC as there is demand for cashew in the international market.

GFDC is expanding its activities in to other fields like ecotourism, backyard poultry, medicinal plants and spices cultivation etc. The Salaulim botanical garden developed by GFDC has become important ecotourism and educational destination for students and tourists visiting Goa. I welcome the viewers to give their valuable suggestions for organizational development of GFDC.

C. A. Reddy, IFS
MD, GFDC
